

Enigma - API Guide

The panel accepts only GET APIs.
Here is an example API format,

[http://reseller.com/api/?key=YOUR-KEY&service=SERVICE-ID&action=create&link=\[LINK\]&quantity=\[QUANTITY\]](http://reseller.com/api/?key=YOUR-KEY&service=SERVICE-ID&action=create&link=[LINK]&quantity=[QUANTITY])

YOUR-KEY have to be replaced with your API key from the reseller panel.

The SERVICE-ID have to be replaced with the exact service ID from the reseller panel, probably there is a page named "Services" or "Price List".

The action is an additional parameter, most of the panels accept the action=create, some are accepting "add" and even "order". Carefully read the exact reseller panel API documentation.

[LINK] & [QUANTITY] would be replaced when the order is being submit, do not change anything on these values, the keys may be changed (&link= and &quantity=).

Now you can order by API and comments, hashtags and even mentions.
Here is an example usage and for them,

Mentions API:

[http://reseller.com/api/?key=YOUR-KEY&service=SERVICE-ID&action=create&link=\[LINK\]&quantity=\[QUANTITY\]&mentions=\[USERNAME\]](http://reseller.com/api/?key=YOUR-KEY&service=SERVICE-ID&action=create&link=[LINK]&quantity=[QUANTITY]&mentions=[USERNAME])

Hashtag API:

[http://reseller.com/api/?key=YOUR-KEY&service=SERVICE-ID&action=create&link=\[LINK\]&quantity=\[QUANTITY\]&hashtag=\[HASHTAG\]](http://reseller.com/api/?key=YOUR-KEY&service=SERVICE-ID&action=create&link=[LINK]&quantity=[QUANTITY]&hashtag=[HASHTAG])

Comments API:

[http://reseller.com/api/?key=YOUR-KEY&service=SERVICE-ID&action=create&link=\[LINK\]&comments=\[COMMENTS\]](http://reseller.com/api/?key=YOUR-KEY&service=SERVICE-ID&action=create&link=[LINK]&comments=[COMMENTS])
